

SALES BATTLE CARD

COMPANY OVERVIEW

Heartland Payment Systems is a subsidiary of Global Payments. In 2019, Heartland acquired MobileBytes, now called Heartland Restaurant POS. Generally, they are dealer exclusive (no internal sales). However, Heartland has begun direct sales through their CSMs in select markets without strong dealer presence.

PRODUCTS

Processing, gift cards, eGift cards, email marketing, customer display, kiosk, customer loyalty/ordering app, KDS.

PRICING

- Price by terminal, monthly software.
- \$75/month for mobile app.
- Heartland offers two purchase models:
 1. SaaS + upfront
 2. PaaS (everything one monthly rate)

COMPETITOR STRENGTHS

- **Leverage payments:** They offer an option without payments, but it is cheaper to bundle POS and payments together
- Good eGift program; free integrated online ordering; native kiosk application
- Easy to set up, acquire hardware; simplified UI
- **Features**
 - Lower-power Bluetooth
 - Skip the line (knows when guest is in range)
 - Guests can scan a tableside QR code with their mobile device to order
 - Loyalty capabilities; history, latest spend, phone
- **Good for smaller locations:** Small, independent; good for quick serve
- Mobile EMV tableside ordering device
- Decent enterprise capabilities for menus
- Free integrations - open API

HOW TO ADDRESS THEM

- Much more up front and be clear about payments
- Building out gift cards and loyalty; building out kiosk; loyalty more robust
- SkyTab QR Order & Pay
- Bigger focus on enterprise
- With Shift4, payments are fully integrated, no separate payment application for mobile devices
- Integrations are easy to set up in Marketplace

COMPETITOR WEAKNESSES

- **Reliance on iOS and iCloud causes problems**
 - Not commercial-grade hardware
 - KDS requires iPad, but remote control not supported
 - Frequent updates cause locations to run different versions
 - Different features/functions for mobile app vs. portal
- **Limited featureset**
 - No KDS reporting
 - If not processing with Heartland, critical features are unavailable (pre auth, offline mode, SMS messaging, cash discount, and more)
 - Support is a nightmare
- **Hidden fees**
 - Payment 'junk fees'
 - EMV Failover Fee that punishes sites with EMV readers
 - Compliance Fee: \$125/month
- **Surcharge program doesn't work well**
 - Isn't compatible with WiseCube pay-at-the-table solution
 - Causes confusion for guests paying on customer display, as the fee is added after the initial total is shown
- More cumbersome, complex integration process
- Slow response to market demands; limited dev
- Heavy reliance on dealers means less control over package pricing and installation standards; dealer quality reflects significantly on company reputation & customer experience

HOW TO ADDRESS THEM

- Shift4's Advantage Program is a better, more compliant option, with dual pricing, supplemental fee, and cash discount options.
- Advanced KDS features (e.g., rush, merge, list view, all day production items, etc)
- KDS reporting is on Shift4's roadmap for early 2024
- Third-party app Marketplace
