

SALES BATTLE CARD

COMPANY OVERVIEW	PRODUCTS	PRICING
Revel Systems is an iPad-based point-of-sale system with advanced software and a wide range of capabilities. Revel is a pioneer in the cloud-based POS space and has an expansive set of hospitality POS features. In 2018, Revel made a strategic shift to focus primarily on multi-location quick-serve restaurants (QSR) and no longer targets single-location merchants, so Revel fits well with businesses with well-established merchants that need a robust POS system to cover multiple channels or locations.	Program/Features: POS, open API, Loyalty, Kitchen Management, Online Ordering, Delivery, Flexible Payments, Kiosk	• Revel Essentials/Enterprise: Contracted pricing • Revel Enterprise: Contracted pricing • Revel Advantage: Flat-rate processing • POS Terminal: \$99/month per terminal (with two-terminal minimum and three-year contract) • Implementation: Starting at \$674

COMPETITOR STRENGTHS	COMPETITOR WEAKNESSES
Enterprise management • Customization in configuration and able to easily scale with the merchant as they grow • Various integrations available Flexibility • Features support various merchant types, allowing for targeted features that make daily operations easy Multi-channel capabilities • Drive-thru, delivery, and online ordering features • Applicable hardware to align with these needs (e.g., outdoor screens, etc.) • Order and delivery tracking, customer text updates • Online ordering aids customer profile creation	High cost • Customizable features require custom quotes before knowing full cost of use • Best pricing requires three-year agreement • Everything is software as a service (SaaS): KDS, CDS, online ordering. This adds up to hundreds of dollars in SaaS fees every month Requires contract • Best pricing requires three-year contract and a minimum of two terminals • Makes sense that more established restaurants would be more apt to sign up Hardware • iOS only; printers and other accessories may vary
HOW TO ADDRESS THEM	HOW TO ADDRESS THEM
Multi-location functionality • Building out features and functionality • Want and use merchant feedback to determine features Grow with the merchant • SkyTab ecosystem offers features that a merchant can grow into • Continuous product improvement to aid current and future needs of merchants SkyTab ecosystem • Mobile, Online, Glass, CDS, KDS, etc. available to extend flexibility and functionality for merchants • Expands accessibility for merchants extending operations outside traditional locations	End-to-end payments pricing model • Using Shift4 opens up a plethora of features and functionality that is free of charge, both setup and monthly • Less dependent on POS software and hardware and more focused on payment processing Standard pricing • Service pricing model with focus on payments • Can end contract as needed • Custom enterprise agreements Various hardware options • Hardware compatibility increasing (out of necessity); Android
